

SPECIAL MEETING  
ASHE COUNTY BOARD OF EDUCATION  
May 14, 2018

A special called meeting was held for the purpose of reviewing the architectural plans for the middle school project. The meeting began at 5:15 pm with all members present except Mr. King who was unable to attend for health reasons. Architect Larry Greene was also in attendance.

The Board reviewed the plans in detail and instructed the architect on changes to make in order to bring the project back within the \$30M budget. The major changes were: elimination of the additional classrooms, moving the media center back to the center of instruction rather than on the end of the wing and deleting storage off the auxiliary gym.

The Board instructed that the plans include insulation of the walls between the auditorium and cafeteria dining area to minimize the noise factor and to add double doors for the general storage off of the stage. There also needs to be an inside entrance between the main building and auxiliary gym. Car lanes should be such that there is no backup on the AEV lane. A wow factor should be front and center of the facility.

Careful attention is to be given so that sediment is not allowed to run into the pond owned by Mary Gordon Tugman. A civil engineer will do all land matters.

There being no further business, the Chairman declared the meeting adjourned at 6:25 pm.
